

AI Risk Products Launch

1/27/24, 7:47 AM

Announcing AI Risk Products Launch by Magile Software.

We're on a mission to help enterprises confidently adopt AI by managing the risks that often keep innovation on the sidelines.

Our belief: Many transformative AI initiatives never see the light of day because organizations can't effectively manage the risks associated with AI deployment.

That's why we've built two groundbreaking platforms:

AIRQ.AI - For enterprise customers to quantify and manage AI risks using our proprietary algorithms.

AIAssure.AI - For insurance carriers to provide AI risk transfer solutions to enterprise customers using our proprietary AI risk score.

We are excited to announce the launch now because innovation shouldn't be delayed for ideal conditions; it requires the proper protection.
